

CORNELL DEBATERS MEET MCGILL TO-NIGHT

ST. LAWRENCE WATERWAYS IS ISSUE STUDENTS FACE IN THIRD PARLIAMENT SESSION

Large Attendance Expected—Question is Vital—Three Cornell Debaters Arrive To-day—Proceedings Bound to be Lively—First Known Appearance of American Debating Team Here—Much Interest Manifest in Contest.

McGill and Cornell clash tonight at 8.15 sharp in the Union Ballroom. Much interest is manifest in the third session of the "Mock" Parliament for this evening, since, for what is believed to be the first time in the history of the "Lit," an American team will occupy a prominent place on the Parliament floor.

The Cornell men who arrived this morning, are the pick of their university debating circles while the McGill men have made their mark as orators of the highest ability here. Sharp at 8.15 the parliament will be declared in session and with all the pomp and ceremony of a real parliament the members will settle down for an evening of keen grammatical acrobatics as well as a hard-fought struggle on a question that is justly of international importance.

Following the opening of the sitting ten minutes have been set aside for questions to the ministers. This is always looked forward to by the members since it affords an opportunity of enquiring into actions of the various ministers in the administration of the nation's affairs. Explanations, varying in nature are always forthcoming and the general atmosphere of the evening is thereby tuned up to the proper pitch for the debate that is to ensue.

Following the third reading of the bill for the improvement of the St. Lawrence's navigation facilities the momentous debate will begin.

J. Grant Glasco, "Prime Minister" is to pilot the bill through personally and will introduce the discussion. He will in all probability be followed by Nathan Katz of Cornell, who will sit with the Opposition. Ross Scanlan also of Cornell will then speak from the Government benches. R. E. Schwisberg, for the Opposition will follow, then C. W. Kelloway for the Government and finally Donald W. Falconer the final Cornell man for the Opposition.

The Division

The most exciting point in the evening will no doubt be the division. As usual three will be the rush for the doors, one door the Governments' the other the Opposition's. In view of the fact that the last Government victory was won by merely six votes, it is conceded that the vote, under the same conditions, should be equally interesting. Considering the vital nature of the problem for discussion no one can with any degree of surety prophesy what will be the outcome of the session to-night.

Students who attend will be treated to a fund of debating emanating from some of the cleverest debaters ever heard in McGill. Three of Cornell University's most brilliant speakers will deliver their respective opinions on a subject of great international interest—the St. Lawrence Waterways scheme. This problem has puzzled the brains of the greatest politicians in this continent, and has the most intricate cross-word puzzle beaten to a frazzle. The bill, which will be brought forward by the Government, reads as follows:

Resolve that:—
"This House hereby affirms its belief in the wisdom, from a commercial and economic point of view, of improving, in co-operation with the Government of the United States, of America, the navigation facilities of the St. Lawrence River, so as to permit ocean vessels drawing up to 30 the Great Lakes; and also to under-fee of water, to enter and navigate take, as the necessity arises the development of the power at present wasting in the rapids of the St. Lawrence. This House furthermore with the United States of America, signifies its desire to conclude a treaty looking to the Scheme B, of the recommendations submitted by the International Joint Commission, or such modifications as may be agreed upon; and making provision for a Joint Commission charged with the duty of formulating a complete plan which would be subject to the ap-

proval of the two Governments, prior to the beginning of the work of construction."
After puzzling what there is of his brain, over this imposing piece of literature, the Daily reporter has come to the conclusion that it means:—"We the Government want the St. Lawrence River deepened to allow ocean vessels to enter the Great Lakes, and we defy the Opposition to prevent us." Grant Glasco, Prime Minister of the Government (also president of the Canadian Club) will start things moving with the afore-mentioned bill, which should terrify the opposition to a becoming extent.

BRILLIANT SPEAKERS

Much interest is manifest in the third session of the Mock Parliament scheduled for this evening, since, for what is believed to be the first time in the history of the Literary and Debating Society, an American team will occupy a prominent place on the floor. At the first meeting, a large attendance heard some brilliant debating carried on by visitors from Cambridge University, England. Thus to-night's meeting is the second big "scoop" scored by the Lit, this year, and should be very interesting as the first. The Cornell men who arrive this morning are the pick of their University debating circles. Ross E. Scanlan, the leader and most brilliant member of the team, is a senior in the College of Arts and Sciences, and is specializing in English Literature. He has figured in debates against Pennsylvania, Cambridge, and McGill, which he visited last year. He is greatly attached to Canada, and has spent fifteen summers in this country. He has studied the question in point tonight extensively. He is taking a stand against his comrades, and will speak for the government. He is a democrat in his own country. Donald W. Falconer comes to us with an extensive knowledge of history (in which he is 'majoring') and a rich melodious voice, which he has won laurels during his debut in the Cornell Glee Club. He is not connected with equestrian tactics as some may have judged from an announcement in Friday's "Daily" that he belonged to a "Gee Cub." He has won his spurs traveling no doubt helped him to secure for himself the honour of representing his University, though he is only in his first year at Cornell. The "mascot" of the team, at least in years, is Nathan Katz, nineteen years old, who will speak for the Opposition, and endeavour to answer the barbs of Grant Glasco. Katz is nothing if not cosmopolitan—he was born in England went to school in New Zealand, and to college at New York, where a scholarship took him to Cornell. He is a "prodigy" in a sense, reaping high honours in his matriculation examinations which he took at fourteen years of age. Politically a partier represented by those visitors progressive, he brings the number of of three—The three of American politicians.

The McGill men who will take prominent part are Grant Glasco, R. E. Schwisberg, and C. W. Kelloway, who are too well-known to need further comment. Glasco will of course, uphold the Government, as will Kelloway, while Schwisberg will have to use his eloquence to down the powerful arguments which will be used by Ross Scanlan, who is a Government fighter.

8.15 Sharp

At eight-fifteen "sharp" (if anyone is present), the Parliament will be declared in session, and with all the pomp and ceremony of a real parliament will be declared open. The Sergeant-at-arms will majestically walk into the room, with everybody standing at attention, (or as near to that position as possible), carrying the mace, or turnip-plant, in his hands. Then the members will settle down for an evening of keen grammatical acrobatics as well as a hard-fought struggle on a question that is justly of international

MR. W. D. BAYLEY AT YOUNG MEN'S FORUM

Discussion on the Christian View Point of Politics

W. D. Bayley, Independent Member Manitoba Legislature will speak at the Young Men's Forum at Central Y. M. C. A. on Sunday next, November 23rd at 4.15 p. m. His subject will be "The Christian Viewpoint in Politics."

An idea of Mr. Bayley's position of leadership in the west may be gained from the following statement made in June last by Hon. J. Bracken, premier of Manitoba. "I have known Mr. Bayley for the past three or four years and have no hesitation in saying that he is a remarkably gifted speaker and one of the best informed members of our Legislature on social, economic and political questions. He was elected a member of the Labor group, which sits in opposition to the Government, but he has recently severed his official connection with them and now occupies a seat among the Independents. I do not agree with the advanced position he takes on some subjects, but I am very glad to be able to say that he is an interesting and gifted speaker, and possesses the gift of humor and eloquence."

McGill men are specially invited to attend the Forum and take part in the discussion.

BIG DEBATE TO BE HELD ON MONDAY

Cercle Francais to Stage Economic Debate

BIG QUESTION

Private or Public Ownership Of Railways

"Resolved that Private Ownership, as opposed to public ownership, of railways is justified" will be the subject of a debate to be held by the Cercle Francais at their regular meeting Monday Evening, November 24th, at 8.15 p. m.

The affirmative side of the debate will be sustained by H. B. Bydwell and J. Bogante, both of Arts '26, and the negative side by S. Altrovitch of Arts '26 and Gilbert Lafleur of Law '27. While all these students have specialized in the study of Economics, Lafleur, being a Law Student, is in a especially good position to discuss this question of ownership of railways.

Since this is the first debate of the season on economic topics of such general interest, it is expected that an unusually large number of students will be present at the meeting. An additional reason for anticipating a large attendance is the obvious revived interest in the activities of the Cercle Francais. All of this year's meetings have been very well supported, the climax of success being reached in the recent joint meeting with the Societe Francaise.

A very successful method of sustaining interest in the Cercle Francais has been the adoption of the policy of varying the program. Following the method it has been decided to hold this rather unusual debate on Monday evening, November 24th, at 8.15 p. m. Bydwell, Lafleur, Bogante Altrovitch all four very interested in the subject, will speak for ten minutes each and Bydwell have a five-minute rebuttal. The resolution will then be open to discussion by the meeting, and it is hoped that, as the question of private or government control of railways is so vital to every Canadian, many of the large meeting anticipated will get up and discuss the motion.

Ten minutes have then been set aside for questions to the ministers by the various members. The latter no doubt look forward to this, though the former will in all probability relish the procedure a great deal less, especially if they are of an ultra-importance.

(Continued on page Three)

PLAYERS' CLUB
A meeting of all interested in the organization of a Players' Club will be held in the Union on Monday afternoon at 5.00 o'clock.

MAJOR NEY ORGANIZES 1925 TOURS

Itinerary Similar To Last Year's

JULY AND AUGUST

Splendid Opportunity For a Delightful Inexpensive Summer

Another students' tour to England and France is being organized by Major Ney, of the Overseas Education League, for this summer of 1925. A rough itinerary has been made out and will be very similar to that followed last year. The Canadian Pacific Steamship "Marbun" has been selected for the Eastward voyage, the entire third-class accommodation being reserved. The S. S. "Marbun" has excellent deck accommodation and sails from Montreal on June 27th. The party will return from Liverpool on August 19th by the S. S. "Montreal", which has again been especially chartered by the Overseas Education League. The "Montreal" will call at Cherbourg on Aug. 21st where the Teachers' Party will embark.

At the present time the management have not been able to state the exact cost as the statement for 1924 has not yet been drawn up, but it may be assumed that the estimated cost for 1925 will be in the neighbourhood of \$350 or \$360. This is slightly in excess of last year's trip, but it must be taken into account that the value of sterling has risen, and is still rising, considerably.

As stated above, the itinerary to be followed will be similar to that of 1924, though on this occasion it is probable that for various reasons, less time will be spent in Scotland where great difficulty is already being experienced in securing the necessary hostel accommodation. York will again be included in the programme, and from there the party will proceed to Cambridge for a three or four days' visit. Following this, four or five days will be spent at Stratford-on-Avon during the time of this Shakespeare Festival and while at Stratford, a Shakespearean play will be attended each evening in the Memorial Theatre. From there, visits will be made to Warwick and Kenilworth.

This is followed by the visit to France, where probably ten days will be spent. From Paris, visits will be made to Fontainebleau and Versailles and to the battlefields including Verdun, Albert, Amiens and Arras. Following this, approximately a fortnight will be spent in London, during which time, visits will be paid to Wembley, to Oxford, Canterbury and other places of interest in the vicinity leaving London for Liverpool, members of the Party will be given the opportunity of a few hours in the latter city in order to see the new cathedral.

This year membership will be confined to undergraduates of the Universities, together with graduates of 1921 and 1925, and students actually engaged in post-graduate work. Forum of membership will not be available until the end of December, but application for membership can now be made. P. A. Waite, East Wing of the Arts Building. All such applications must receive the endorsement of the League's representative, Lieut-Col. W. Bovey. All members of the student body may take advantage of the special steamship facilities, which the League provides for the Tour.

SUNDAY SINGING WILL COMMENCE TO-MORROW

A Sunday Sing will be held in the S. C. A. Room at 9.00 p. m. Sunday Evening. Many will no doubt, remember the Social Evenings from last year and will come in for the evening, but it is the First Year Men who are next cordially invited. Many of them will have nowhere to go after evening Church and it is the object of the Sing to fill this gap. It will be a social hour when students can get together and have a good time, there will be refreshments served during the evening. It is expected James L.

QUEEN'S VS. R.V.C. DEBATE TO-NIGHT

"Unions of Employed Workmen Beneficial to Society"

The Convocation Hall of the R.V.C. will be the scene this evening at 8.15 of the third Women's Intercollegiate Debate between Queen's and R.V.C. All students, men as well as women are cordially invited to attend, and those who were present at the first debate of this nature, which was held at R.V.C. in 1922, will need no urging.

The subject to be discussed is, "Resolved, that Unions of Employed Workmen are Beneficial to Society." Miss Edgland and Miss Seriver, of R.V.C., will uphold the affirmative, while Miss Arize and Miss Moffat, of Queen's, will take the negative side. The judges will be Miss Bryan, of the Trafalgar Institute, and two prominent local lawyers, Mr. Howard S. Ross, K.C., and Mr. Armistage Ewing.

Toronto has entered the Women's Intercollegiate Debating Union, and will debate with R.V.C. and Queen's this year for the first time. Simultaneously with the debate here there will also be debates going on at Kingston and at Toronto on the same subject. Miss Gurd and Miss MacSporran, of R.V.C., will argue on the negative side at Toronto, against Varsity, and teams from Varsity and Queen's will debate at Kingston.

Much is to be hoped from the important steps which have been taken recently in the formation of the Women's Intercollegiate Debating Union, and it is expected that the debate in the Convocation Hall this evening will be well supported. There will be dancing after the debate.

UNIVERSITY SERVICE AT THE UNION

Jim Endicott of 'Varsity will Speak

11 A.M. TO-MORROW

All Students of University Cordially Invited

The first Student service of the year, run by students for students, takes place in the Union tomorrow morning at eleven o'clock. It will be something more than a service for several new items have been added, which should prove of special interest. There will be an augmented choir, which will include members of the Choral Society. The program also includes vocal solos instrumental items. The service is open to all students, and members of the faculty are also cordially invited.

Jim Endicott, of Victoria College, Toronto, an outstanding student of the 'Varsity, will be the speaker. He was born in China, the son of a missionary, and in his capacity as Chairman of the Toronto University Student Christian Association, is especially interested in missionary work, and is intended to take it up as his vocation. Having travelled widely, he has a wide range of interesting knowledge, which, added to his eloquent powers, makes him a fine speaker. He is well-known in most Universities in America, having represented his University many times on international committee of the Students' Movement. Many McGill students have doubtless heard him at Elgin House Conference, where he was a prominent speaker. He also took part in the Indianapolis conference, and in the national conference held at Toronto two years ago. Wendell MacLeod will act as chairman, and a student from the Royal Victoria College will read the lesson.

University services have formed a part of McGill activities for many years, and have been popular, as it is conducted entirely by students, especially with out-of-town students, along absolutely nonsectarian lines. Last year two successful services were held, the respective speakers being the Rev. J. W. G. Ward and Robert Wilder. At least two University services are held during the season, and if possible, a greater number of services will be arranged for.

Endicott will be present and that he will say a few words. This Sing is open to the whole Student body, as

OUTLINE OF METHODS OF ASTRONOMERS

"Making Discoveries In Astronomy"

DR. YOUNG

R.A.S.C., Sigma Xi and Physical Society hold Joint Meeting

The day of an astronomer in one of the large observatories begins at 15 minutes past sunset and lasts until dawn. Dr. R. K. Young of Toronto University told a joint meeting of the Royal Astronomical Society, the Royal Astronomical Society of Montreal branch, Sigma Xi, and the McGill Physical Society, in his lecture "Making Discoveries in Astronomy." Dr. Young described a typical night's work. The astronomer has already made up a program of 12 or 20 stars whose spectrum he wishes to examine and as soon as possible after sunset, about 15 minutes, he opens his instrument which is already trained on the star, and places the photographic plate in the spectroscope. In from 10 minutes to 2 hours, depending on atmospheric conditions the exposure is completed and the plate withdrawn. The telescope is then trained on the next star and while a picture of its spectrum is being taken the plate from the first observation is developed. This routine continues until 12 o'clock when lunch is served. After lunch the work is continued until dawn. As none of these stars have ever been observed before one is never sure what the plate will show and there is always a great deal of interest when the results of the night's work are examined.

By means of slides the lecturer described the spectroscope and made a number of various kinds of spectra. The spectroscope by means of a telescope and prism breaks white light into its component parts. White light, to use the lecturer's own simile in like a library, in which the books are well in disorder with even the pages of the books mixed up. Nothing can be learned by just looking at the books but if they are sorted and the leaves placed in their proper order a great deal can be learned. The spectroscope takes the mixed up white light and sorts the various component rays into their proper places and from a study of the resulting spectrum a great deal about the source of the light can be found out.

Before we can find out anything from the spectrum we must know the characteristics of the various spectra caused by different sources of light. It has been found that in the spectrum of an incandescent solid, a glowing liquid, or a glowing compressed gas all the colours are represented from violet at one end to red at the other. When the source of light is an arc or an incandescent gas such as is caused by an electric spark the spectrum consists of a number of isolated lines of certain colours the lines for each element always being the same, and bearing the same relation towards each other in position hence each element can be recognized by its spectrum. A special absolute scale has been devised to measure the position of each one of these lines in the spectrum, and since no two elements have their lines in exactly the same place a complex light may be broken up into its various elements.

If between a source giving a continuous spectrum and the spectroscope we interpose a gas giving a line spectrum some of the light will be absorbed and we get a continuous spectrum crossed by a series of dark lines, these dark lines occupying the positions which the bright lines in the line spectrum would have occupied. The spectrum of the sun contains a very great number of these dark lines showing that the atmosphere surrounding the sun contains a great number of elements in an incandescent state, and by analysing the spectrum we know just what elements they are.

The spectra of the stars and most other celestial bodies resemble that of the sun and contains traces of all elements found on earth. That of a comet is somewhat different and shows that the gases are at a low pressure. The spectrum of a nebula contains traces of an unknown element which astronomers call Nebulium. The absence of lines may not mean the absence of the element. The great heat may have decomposed the element into some still simpler form. Some stars show broad bands thought to be tellurium oxide.

Some of the lines in spectrum are more intense than others. It has been found that the hotter the source gets the greater the tendency of the intensity to shift towards the blue end. Thus the temperature of any heavenly body is unknown.

VISIT PAID TO WHITE STAR S.S. DORIC

Preliminary Plans For College Tours Discussed

NEXT SUMMER

Trip Through British Isles, France and Belgium

Preliminary plans for college tours under the direction of Earl B. Hubbell were discussed yesterday noon at a luncheon given on board the S. S. Doric, which sailed from this port this morning for the last time of the season.

In a brief talk after the luncheon, Mr. Tobin of the White Star-Dominion Line, told representative McGill students and officials of the plans which have already been formulated for the year 1925. Mr. Tobin mentioned the decided success of last year's venture, when over six hundred tourists, most of them students, were conducted through the British Isles, France and Belgium, and he was sure that profiting by the experience already gained, the tours next summer would be even more delightful and more successful than the one already held. Mr. Tobin pointed out that any hotels which had not proved perfectly satisfactory, had been ruled off the list now drawn up, so that the accommodation will be beyond the possibility of unfavorable criticism.

Encouraged by last year's results the White Star Line is conducting six tours next summer, stated Mr. Tobin, and according to present indication there should be a total of approximately three thousand people taking advantage of the \$350.00 rate for the thirty-six day trip. Mr. Tobin realized fully that other companies were drawing up plans for similar tours but he felt satisfied that the White Star, benefiting by past experience, would be able to compete successfully with any other propositions.

In concluding his remarks, Mr. Tobin drew attention to an extension tour to Palestine and the Mediterranean at a total cost of something over six hundred dollars. This tour will be limited to a comparatively small number and, after making the routine European trip, the more fortunate people will sail from Marseilles early in July.

Mr. H. G. Fletcher, secretary of the Students' Council, thanked the officials of the White Star Line for their hospitality and, in referring to last year's Hubbell tour, stated that he had heard it highly recommended on numerous occasions. He mentioned the broadening influences of travel and hoped that many students would be able to take advantage of the opportunities being offered. Prior to their departure, the guests who so desired, were shown around the Doric a ship of 15,500 tons, and the largest boat coming up the St. Lawrence. Among those present were Mr. Tobin, Mr. Manson, and Mr. Collins, of the White Star Line; Mr. Tobin, of Toronto; Mr. G. H. Fletcher, secretary of the Students' Council; Major Forbes, of the Athletic Board; and students representative of the various Faculties of the University.

ment which astronomers call Nebulium. The absence of lines may not mean the absence of the element. The great heat may have decomposed the element into some still simpler form. Some stars show broad bands thought to be tellurium oxide.

Some of the lines in spectrum are more intense than others. It has been found that the hotter the source gets the greater the tendency of the intensity to shift towards the blue end. Thus the temperature of any heavenly body is unknown.

If the source of the light is approaching the observer it is found that the dark lines are displaced towards the violet. If the source is receding the lines are displaced towards the red and the amount of displacement varies with the speed of the body. Hence the astronomer can tell both the direction of motion and the speed of the heavenly body under observation.

In the case of planets, if the lines are slanted we know that one edge is approaching and the other receding, in other words that the planet is rotating and the angle of the slant gives the speed of rotations. The width of the black lines gives the absolute brightness of the stars

MONTREAL, SATURDAY, NOVEMBER 22, 1924.

CORNELL AND THE MOCK PARLIAMENT

There will be witnessed this evening for the first time in many years, the appearance of an American College debating team on the debating floor of McGill. Certainly it is the first occasion in the history of McGill on which Americans have entered the Canadian Mock Parliament and debated under the old traditional rules of debate which govern the Parliaments of Great Britain and the majority of her Dominions. Cornell men will participate in the battle on the St. Lawrence Deep Waterways question and will be heard from both sides of the House. Undergraduates may be sure of hearing practised and well-equipped men speak on a subject that is vital to both countries and with which it is the duty of every thinking Canadian to be acquainted. There has been an inclination during the past few years, for the undergraduates of this University to show but scanty interest in the national and political affairs of their country, and whereas other universities have been turning out men fully cognizant of the problems of to-day, there is room for doubt whether the majority of the undergraduates have that slight sense of national responsibility which it is the function and duty of every Canadian University to instill.

The Mock Parliament has always been one of the best attended of the undergraduate activities, and the form of quasi-humour in debate met there has proved extremely popular. The introduction of an intercollegiate as well as an international aspect to the function should be the signal for an unusually large turnout to-night and it is to be hoped that even a Saturday night may be sacrificed to what promises to be one of the most interesting political battles ever waged in the Union.

CONDENSED COMMENT

A University Church Service will be held tomorrow morning in the Union. It will be essentially a student function, with a student leader, a student choir and a student speaker, and is intended to be as broad and non-sectional as possible. There is no doubt that such a service fulfils a purpose that is aimed to give the student mind depth as well as breadth.

OUTLINE OF METHODS OF ASTRONOMERS

(Continued from page 1.)

and by comparing these widths we get a comparison of the various stars. Dr. Young was well fitted to speak with authority on his subject. A graduate of Toronto he had experience in several observatories in the States. He lectured for a while at University of Kansas, going from there to the Dominion Astrophysical Observatory at Victoria, and is now connected with Toronto.

Following the lecture a business meeting of the Astronomical Society was held. A resolution was passed to send letters of condolence to Mrs. Strong, widow of the former Sec-Treas of the society and to Mrs. Ridgwell, mother of Ernest Ridgwell who was drowned last spring at Ste. Anne.

The following new officers were elected: Honorary President, Monseigneur Choquette; President, Justice E. Howard; First Vice-pres, Dr. Eve; Second Vice-pres, Dr. Gilson; Secretary and recorder, Miss Douglas; Treasurer, Dr. Kelly; and council members: Geo. Sample, H. B. Ashbury, Col. W. E. Lyman; Julien T. Smith, and John L. Clark.

DENTAL NOMINATION

The following Dental nomination was received on Thursday, Nov. 20th. We the undersigned nominate Scott T. Goodnot as representative to the Student's Council for the Faculty of Dentistry.

Atlantian: "What do you think of our city?"

Manconite: "It's not as well laid out as ours."

Atlantian: "Well, it will be when it's as dead as yours."

—Ex.

Dr. Eve announced that arrangements are being made for a trip of a number of members of the society to view the partial eclipse of the sun at Toronto, in January next.

NOTICES

IMPORTANT.

It is urgent that all accounts due to last year's Annual Board be paid at once.

ATTENTION

All those having keys for lockers at Stadium, please return them and receive their 25 cents.

ROWING PRACTICE.

Mr. Molmans regrets that he was unable to be present Thursday. However, coaching and attendance will be taken by members of the executive to-day, and Mr. Molmans will be in the Union from 3-6 p.m. Saturday for those who wish for further coaching or attendance.

MARITIMERS

Dr. W. W. Chipman will give an address entitled "New Lamps for Old" to all Maritime students at 8:30 p.m. Monday Nov. 24 in the Main Hall, Strathcona Hall. Asplen Orchestra will be in attendance and refreshments served. A big turnout is expected.

ANNUAL PHOTOGRAPHS

The following will report at Notman's studio, Peel St., on the day and hour specified below, for the purpose of being photographed for Old McGill 1926. The sum of one dollar and fifty cents will be collected at the time of sitting.

SATURDAY, 9:00 A. M.

Misses:—R. F. Secord, L. R. Silver, J. I. Silverman, R. Stromberg, V. H. Talpis, F. E. Williams, E. C. E. Wilson, E. Zaltsman, L. I. Brown, D. Wiselberg, I. G. Allen, L. E. Argue, G. D. Brodie, E. Cossman, M. E. DeBlois, M. C. Higginson, E. L. Osgood, R. Ward, D. M. Mellor, E. C. Greene.

SATURDAY, 5:00 P. M.

R. S. Bell, L. J. Cooke, R. P. V. Cooper, P. A. Cossman, W. B. Hamilton, S. W. Hetherington, W. Levine, J. G. Massue, H. L. Mills, C. Perrault, S. M. Walford, D. R. Walker, W. W. Walker, Misses:—F. Anglin, L. S. Davis, E. L. Dubord, R. R. Duntun, M. P. Gilman, W. Griffin, G. Hart, L. W. Hurd, V. A. Kayser, I. A. G. Knehn, I. Nixon, S. Popliger, M. Ratner, A. L. Saunders.

MONDAY, 9:00 A. M.

H. Andrews, E. B. Brown, S. R. Cooper, W. A. Edwards, E. Egerston, R. F. Gamble, W. Ginn, Hat-cher, A. O. Floyd, W. E. Johnston, D. H. MacFarlane, P. S. Milley, G. C. Wadsworth, D. H. Woodhouse, F. M. Sellars, C. Whitmore.

MONDAY, 5:00 P. M.

C. T. Ballantyne, G. C. Bray, E. C. Common, M. N. Crestohl, E. H. Decary, M. Feigenbaum, M. Goldenburg, J. Heilal, J. M. Heilfield, J. P. Hume, J. H. Hutcheon, V. M. Lynch-Staunton, A. H. Mettarlin, A. L. Morris, H. E. O'Donnell, J. A. Ogilvy, G. B. Pudicombe, J. Specter, W. H. Wilson, E. W. Mellen, H. Wells.

NOTICE

All Interfaculty Rugby equipment must be moved from Molson Hall at once.

NOTICE TO FENCERS

From now until the end of the season the practices will commence at 4 p.m. Maître Raimondi will conduct classes for beginners at 4.30 p.m., and again at 5.30 p.m. Beginners should try to attend one of these classes. All outstanding fees must be paid to-day. A catalogue has been received from a Toronto firm containing illustrations and prices of the necessary fencing equipment. The club is sending an order, and any member who so desires may send his order along with that of the club, and in this way obtain the articles cheaper than he would by sending a private order. All particulars may be obtained from the manager.

INTER-CLASS HOCKEY.

Will all classes kindly elect their hockey representatives and hand in their names as soon as possible to Athletic Office, the Union, in care of W. I. Whitehead, inter-class Hockey Manager, or phone Walnut 1720.

ARTS '26

Two tickets remain for any members of Arts '26 desiring to go to the Junior Prom. Kindly apply to Alan A. Macnaughton before 1 p.m. Saturday.

SWIMMING AND WATER POLO.

Attendance will be given men practising on Monday, Wednesday and Friday from 5.30—6.30 at the K. of C. tank, Mountain St. Also men receiving instruction from Mr. Verey on Tuesday from 2—5 will receive attendance. There will be the general swimming on Thursday from 5—6 and Saturday from 2—5, but there will be no attendance given on these days.

ART TITLES FOR ANNUAL

The following art titles are required for the McGill Annual participants may be obtained from A. W. Wallace, Architectural Draughting Room, Engineering Bldg.

McGill Daily, Arts Arts Juniors, Dentistry, Dentistry Juniors, Law Juniors Medicine, Medicine Juniors, Pharmacy, Science, Science Juniors, Theology, R.V.C., R.V.C. Juniors, Music, M.S.P.E., Athletics, Clubs and Societies, Fraternities Advertisements, Agriculture, Law.

TRACK EQUIPMENT

Those men who were on the track team and still have their equipment please bring them back to Molson's Hall as soon as possible.

ARTS DINNER COMMITTEE

Will each year in Arts elect one representative to the Arts Dinner Committee. Names of representatives to be given to some member of the Arts Undergraduate Society before noon to-day.

WRESTLING

There will be a wrestling practice in Strathcona Hall at 5 o'clock every Monday and Wednesday until further notice.

MCGILL RIFLE ASSOCIATION

Will all those who have rifles out please return them at once to the janitor of the Arts Building.

CHESS CLUB

The postponed match with the La Patrie Chess Club will be held Thursday Nov. 27.

HOCKEY PLAYERS NOTICE

Every McGill student who intends to play hockey this year should attend the Hockey Rally Dinner at the Union on Saturday night at 6 p.m. Purpose—to discuss hockey plans for the winter. Cost—50 cents per man.

Will all students interested please leave their names written on a note with Miss Oliver at the Union before Saturday noon, in order that Pierre might kill a fatted calf of the proper proportions. All up the puck-chasers!

INDOOR BASEBALL

As interclass baseball is to start in the near future, it is necessary that all classes intending to take part appoint a representative to be present at a meeting next week. The date of the meeting will appear in the Daily the first of next week.

Gym attendance is given for games and practices, which is always an inducement to men in the first two years.

Players showing up well in this league will find it easy to catch a position on the Reds or Whites, which teams represent McGill in the city league.

R.V.C. JUNIORS

Will anyone desiring a ticket for the Junior Prom please get in touch with the R. V. C. Junior Prom. Committee representatives immediately? Tickets desired must be paid for by Saturday noon, Nov. 22. Price \$6.00.

M. HIGGINSON.
R. DUNTON.

PHARMACEUTICAL SOCIETY OF MCGILL

An important meeting will be held at the New Medical Bldg. on Tuesday Nov. 25 at 8 p.m. sharp. Business:

—Dance Discussion and Basketball talk. New members are asked to be out in force as this meeting is of great importance. Refreshments and amusements in quantity.

TRACK TEAM ATTENTION

All members of the track team who wish pictures of the team will kindly leave \$2.00 with Miss Oliver at the Union. It is necessary that this money be paid before the pictures are ordered.

RADIO ASSOCIATION

On Wednesday, Nov. 26, the association will visit the La Promme broadcasting station and printing plant. Members are asked to meet at the St. James St. entrance at 2 p.m.

On Tuesday December 5th, the association will hear Mr. W. B. Cartnell, radio engineer of the Northern Electric Co. He will speak on "Radio Frequency Amplifiers" in the Physics Building at 5 p.m. All are cordially invited.

MACCABAEAN CIRCLE.

The next meeting of the Maccabean Circle will take place this evening, November 22nd, in the Community Centre, Shaar Hashomayim Synagogue, Kensington Road. The speaker will be Dr. Schmura Lev'n. of Zionist fame.

Eddie Gross and Miss Sadie Shapiro will supply the musical programme.

As this is to be a joint meeting of graduates and undergraduates, all students, graduates and friends of members are invited.

BOXING PRACTICE.

There will be boxing practice in Molson's Hall at 5 o'clock on Tuesdays, Wednesdays and Saturdays. Owing to the coming meet it is imperative to have a full attendance.

C.O.T.C. RIFLE ASSOCIATION.

The first shoot and business meeting of the C.O.T.C.R.A. will take place in the basement of the Montreal High School on Saturday at 2.30 p.m. This club is open to all members of the C.O.T.C., and to any in the University interested in indoor rifle shooting.

JUNIORS

Presidents of Junior Years are requested to appoint or have elected as soon as possible one member of the class, to write the Class History for the Annual. This matter is of the utmost importance.

CHORAL SOCIETY AND GLEE CLUB

All members of the above societies and any other singers are requested to be present at the University Church Service on Sunday to form a choir to lead the singing. They should be at the Union by 10.45 a.m. to allow time for the arranging of parts and seating accommodation.

LOST

Will the reporter who borrowed an Eversharp pencil last Friday night please leave it in the Daily office.

ONE WHO NEVER MADE A SPEECH IN HIS LIFE STARTLED COLLEGE MEN

Does education educate? This pointed question was asked and answered under singular circumstances at a banquet held in London, England, some three years ago. A man who had never made a speech in his life addressed a gathering of college graduates and he made a hit. The article dealing with this was published from the pen of Alexander Irvine in "The Teachers' World." It is such a unique and valuable piece of literature that there is no apology necessary for reprinting it, after a lapse of three years.

The article follows:—
"About one hundred and fifty students who had just received their degrees met for a final dinner, before they separated to go into various parts of the world, probably never to meet again. They had been so surprised with dignified shyness during the four years at college that they decided to omit the address at the final function.

"Of two hundred professors there was one man whose criticism of college addresses was well known. He had never made an address in his life, and it was suggested, more as a joke than with any serious intent, to invite him to deliver the address. If they had imagined from a moment that he would accept the invitation he never would have been asked. He accepted, however, and the committee decided to let the class grin and bear it.

"The dinner took place in one of the world's greatest hotels. The banquet hall was known far and wide for its artistic arrangements and luxurious furniture. The young men were dressed in conventional full evening dress. Most of them were future captains of industry. During the course of the dinner there was a good deal of joking and some speculation about the professor's address. When the dinner was over the chairman rapped for order and introduced the speaker.

"Gentlemen," he began, "I never made a speech in my life, and I don't intend to begin now. I have something to say, however, and in saying it I will follow Luther's threefold rule: 'Stand up straightly, speak out boldly, and sit down quickly.'

"We are in one of the famous banquet halls of the world. Belchazzer's hall compared to his was a lodging on the third floor back. No such viands graced his board. What there was there was elegant for that day, but we live in another age of art, craftsmanship and luxury. From the four corners of the earth came the things on this table. From the lowest forms of day labor to the highest form of art we have around us samples of at least a hundred forms of human work.

"Take this tablecloth to begin with. It is of most exquisite workmanship. It involves weaving to go no farther back—bleaching, smoothing, designing. It is a damask linen, beautiful and most pleasing to the eye. I want to ask you a question: Is there anyone here who knows from personal experience anything about the labor involved? Have any of you ever contributed any labor to the manufacturing of table linen? I am serious, gentlemen. If any of you have, I would like him to say so. There was absolute silence. 'I understand, then,' he continued, 'that the making of such a thing is beyond your ken.

"Let me draw your attention to the samples of pottery here. Surely the men and women who produce such beautiful things are artists. What a joy it must be for a man to hold such a thing in his hand—complete—and say, 'I made it!' Many forms of labor are involved here, also—the digging of clay, the carting, fashioning, painting, burning, baking and finishing. If there is a man here who has ever touched this form of labor, let him answer. No one!

"There are samples of the most exquisite, and I know, costly, cut glass. That also involves much labor and great art. It is a unique industry in itself. I will not detail the process; we see the result, but the various forms of labor involved are practically unknown to us. I would be rather surprised to find a man among you who had ever touched this industry at any angle.

"In this way he went over the silver, and dwelt rather lengthily on the subject of mining and the life of a miner. Nothing escaped his notice. He drew attention to the carpet and rugs on the floor, to the curtains and drapery of the great windows, to the mural decorations, executed by the greatest living rural painter. There was a rich fresco around the room. He called attention to it. When he had gone over most of the things in the room he turned again to the table.

"There are cut flowers here," he

said. "Most of you spent some years in the study of botany, but I don't think any of you would undertake to give us a complete classification of what we see and enjoy on the table. There was a disposition to laugh, but he wiped the smile from every face around the table by quietly saying, 'Perhaps you are to be congratulated that you are at an age when a sense of humor covers a multitude of sins, but personally I cannot enjoy that which gives me pain.

The Motive of Education.
"I am a representative university man, seriously asking myself and you whether the system we call education educates? The silence became oppressive. The men were thinking.

"Perhaps," he continued, "I should have put you more at ease by telling you at the beginning that I have never experienced the joy of fashioning articles with my own hands. Nor anything useful for that matter. Here we are, then, a group of men on whom a university has set its stamp. We produce nothing to eat, we could not even lend a hand in the making of anything we see around us, and truth compels me to venture the suggestion that in ninety-nine cases out of a hundred the chief motive of a college education is to escape actual participation in just such work as gives or ought to give joy to the worker.

"A timekeeper performs a useful function, so does a cash register, but the function of education is not to turn out timekeepers or cash registers. It has been truly said that if ten Bachelors of Art were wrecked in mid-ocean they could not build a pintoen to save their lives! They would be equally helpless in any critical emergency where practical knowledge of the ordinary things around us was imperatively necessary. A statement of the problem is not a solution, and we do not gain much by stating that the system is to blame and we are not.

"You certainly are not to blame. You are the victims of whatever system we have. I cannot say that I am blameless. I do not believe that a smattering of languages, of mathematics, and history is education. I believe the system of cramming these things to pass an examination is pernicious. So having been asked for the first time in my life to make an address, I made it an opportunity to enter my protest.

The Purpose of Education
"Education is to prepare and equip for the duties and responsibilities of life—not to turn out industrial and commercial bosses, gaffers, timekeepers and cash registers. I would hardly be justified in taxing you your time with these observations alone. In addition, I want to say this: Most of you are destined to be masters of men. You will organize and mobilize their labor, you oversee it.

"When you see men around you actually creating beautiful things with their hands, I would like you to remember that it was my opinion that actual labor in the arts and crafts and industries is an infinitely nobler contribution to the happiness of mankind than clipping coupons and living on the sweat of other men's brows.

"It will not come in our day, but the world will ultimately come to understand that the training of the mind is as necessary as the training of the body. Why should it be considered an unthinkable thing that a blacksmith or a carpenter should need an education? Why should college men consider it degrading to handle tools and make useful and beautiful things?

"Why should a university perpetuate such a revolt against nature in which the man who does no useful work at all is considered a gentleman and the creator of wealth and beautiful things should be considered low caste in Anglo-Saxon civilization.
"I want to point out to you that the highest form of culture and refinement known to mankind was intimately associated with tools and labor. In order to do that I must present to you a picture, imaginative but in accord with the facts of history and experience.

A Dramatic Conclusion.
"He pushed his hair back and stood a few feet from the table. His face betrayed deep emotion. His voice became wonderfully soft and irresistibly appealing. The college men had been interested; they were now spellbound. He raised his hand and went through the motions of drawing aside a curtain.

"Gentlemen," he said, "may I introduce to you a young Galilean who is a master builder—Jesus of Nazareth!"

"It was a weird act. The silence became oppressive. As if addressing

ST. LAWRENCE WATERWAYS—THIRD SESSION

(Continued from page 1.)

serious turn of mind. It affords an various ministers in the administration of the nation's affairs. Explanations varying in nature, are always forthcoming, and the general atmosphere of the evening is thereby tuned up to the proper pitch for the debate which is to ensue.

Following the third reading of the bill for the improvement of the St. Lawrence River's Navigatory facilities, the momentous debate will begin. J. Grant Glasco (who has been mentioned before in this article) is to endeavor to uphold the bill through personally, and he will introduce the discussion. He will read the resolution, and thus having prepared the piece de resistance, or in other words, hunk of battle, he will settle down to speculating on the immense advantages of the Waterways Bill, and the utter foolishness of rejecting it.

Nathan Katz, of Cornell, who will sit down with the Opposition will probably be the next speaker according to yesterday's "Daily." He has a clear and incisive mind, which he must keep sharpened to the limit, in order to prove that J. Grant Glasco's idea of the thing is foolishly transparent, and it is probable, that Katz, with his ability to look into the dark, will be able to do this. If the programme is followed out, Ross Scanlan, the shining light of the evening, will next deliver his thoughts, and will try to send Katz into oblivion. McGill will again come to the fore in the person of Schwilberg who will take on the argument where Katz left it, and endeavor to destroy the bill once for all. C. W. Kelloway is the next upholder of the government, and Donald Falconer, of Cornell will wind up the contest in a wave of brilliancy.

The most exciting point in the evening will no doubt be the division. This part of an evening's parliament is always fraught with keenest interest, and for that reason, an anonymous member of the Student's Council has placed on his platform, the forbidding of Mock Parliament to students with hearts under A classification. There will be the usual rushes for the doors, one door for the Government, and the other (strangely enough) for the Opposition.

The present Government have had a long and successful tenure of power, which has however, been slowly and surely diminishing. They are at present in a rather precarious position, and a sufficient flow of oratory from the opposition might turn the tide. Last month's meeting of the Parliament brought a win for the Government by six paltry votes, and tonight's vote should be extremely interesting. Considering the vital nature of the problem for discussion, no one can prophesy with any degree of assurance, what will be the outcome of to-night's session.

The management of Parliamentary affairs, have made all possible arrangement to foster a large crowd this evening. Saturday is an off-night and students can sleep in on Sunday morning as long as they please. The executive of the Literary and Debating Society urge every student who possibly can to turn out and make the Parliament a deserving success.

The "speaker," or "chief clerk," of the McGill Parliament, will be the Hon. N. K. Huggess, who has acted in that capacity many times for McGill. Mr. MacOdrum, M.A., of the McGill department of English, will act as the clerk of the house.

The question of serving refreshments at the Mock Parliament was absolutely rejected. It was feared that most of the "members" might forget themselves and use their food on the speakers, instead of in themselves. It was suggested that eggs be scrambled, but it was brought out that it was as bad to scramble them before they reached the orator's viages, as for them to be automatically scrambled afterwards. At the suggestion to serve coffee, it was answered that certain Labour members who

an actual person of flesh and blood he continued:

"Master may I ask you, as I asked these young men, whether there is anything in this room that you could make with your hands as other men make them?"

"There was a pause, a brief moment or two, then with the slow measured stride of an Oriental he went to the end of the table and took the tablecloth in his hand, and made bare the corner and curved oak leg of the table. In that position he looked into the face of the men and said, "The Master says, 'Yes, I could make the table—I am a Carpenter!'

A CORRECTION
A report in yesterday's Daily of a meeting in connection with the "Red and White Revue," stated that the Faculty of Dentistry was not represented. According to a communication from the Dental Undergraduate Society, this statement is incorrect. The facts are that the Dental representative was first on the scene of the meeting.

HOCKEY CLUB WILL RALLY IN THE UNION

Dinner at 6 p.m. This Evening

DISCUSS FUTURE

Coch Shaughnessy Will be Among the Speakers

Coch Frank Shaughnessy, of the McGill Hockey Team, will be the chief speaker at the grand Hockey Rally dinner, which will be held at the Union this evening at six o'clock. It must be strongly impressed that all men who have had any training in hockey, or are interested in, should come to this rally, which is the official opening of the hockey season.

McGill has an excellent local reputation in hockey, which it has maintained for many years, but if enough interest is taken in this major sport, there is no reason why McGill should not be able to make a much better showing in intercollegiate fixtures, or even bring off this championship. McGill has many good men, but many more are needed, for hockey was not considered one of the three major sports by the department of Physical Education for nothing.

It is for the purpose of bringing together all students interested in hockey that this rally is taking place. For the mere sum of fifty cents, guests will receive as much dinner as they can eat, and a great deal of enjoyment, in the way of speeches and musical items. Mr. Shaughnessy will outline the plans of the hockey club for the coming season. Quackenbush last year's manager, and MacMahon will also speak to the students.

Gordon Dempsey, star defence man and captain of last year's hockey squad is expected to take his place with the other hockey enthusiasts tonight. It was formerly rumoured that Dempsey would not turn out this season, but it is practically assured now that the veteran player will be the line-up of the senior team. A host of students were waiting anxiously for the news that Dempsey would again don the steel runners for the Red and White, and his favourable decision will be accepted with general welcome.

Morris who gained a reputation in local and intercollegiate circles for his power in the nets, will quite likely be back with the team. MacMahon is also expected to play as a companion in the defence division with George Dempsey. These two work together very well. MacMahon will be the only one left on the forward line, of last year's team. McGerrigle, star centre of last year, has graduated, and Matty Dineen, has also left. However, there are good substitutes going in the shape of "Bobbie" Bell, O'Donnell, and Glennie.

The Freshman year are expected to produce some good material, as they certainly seem to be a husky bunch. With the prospects of good new material ahead, McGill is looking forward to retrieving her honours in the hockey division. Twelve years have

were accustomed to carry (hydraulic) pistols about with them, might use the coffee to unseemly advantage.

However, the management of the Lit. are expecting to make to-night's Parliament one of the finest events in the history of the University.

elapsd since the collegians brought an intercollegiate championship.

Much friction was occasioned last year when fixtures had to be played off in an unsavoury mixture of mud, water and slosh which had been ice at one time. This turned several players, and still more fans, against it. But this condition has been rectified by the introduction of artificial rinks, on which the teams will play during the coming season. This innovation is expected to stimulate interest in the game greatly.

The reason some other Universities are able to serve meals more cheaply than we are doing at present is because they serve a greater number. Their patronage is greater than is ours. While the cost of provisions is essentially the same all over, the overhead expense is the varying quantity—and it varies in inverse ratio to the number served. For instance.

100 meals at 35c	\$35.00	Cost of provisions	60%.
100 meals at 45c	\$45.00	Overhead	38%.
	80.00	Margin	2%.

200 meals at 35c	\$70.00	Cost of provisions	58%.
200 meals at 45c	\$90.00	Overhead	25%.
	160.00	Margin	17%.

While the cost of provisions in each case remains practically the same, the overhead which is composed of wages to staff, electricity, steam, gas, etc, suffers a perceptible drop. It is obvious that up to a certain point so much of these must be used anyway, so the increase in service practically cuts the overhead in half. Why shouldn't you reap the benefit?

BASKETBALL MEN GETTING INTO SHAPE

Attractive Schedule Arranged For Senior Team

VERMONT AT MCGILL

Western U. Entered in Intercollegiate League—Four Home Games

The senior basketball club are fast rounding into shape, and held a snappy workout last night. The men from the football team are now coming out to practice, and these will strengthen the squad a great deal. The players have been cut into two sections this week, the senior group working under the direction of Coach Van Wagner, who is developing some real material this year, while Eddie Crain, well known here two years ago as a football and basketball star, is in charge of the intermediate A men. The seniors expect to settle down to hard work as soon as the newly-joined men can get in shape, as the schedule this year is particularly heavy. The intermediates will play in the city league as usual, and with the present material developing under Coach Crain, expect to make a good showing.

Perhaps the most attractive schedule very seen in McGill basketball circles has been arranged for the seniors this year. Last year the team played about seven or eight games of which only two against outside teams were played in Montreal. This year however they are assured of eight games, and with a possibility of nine or ten, while of these at least four will be played in Montreal. This will be a wonderful treat for McGill fans, and will afford them a chance to see basketball as it is played by some of the best Canadian teams, and also from across the border.

It is definitely known that Western University will enter the Intercollegiate Union. This will make a league of four teams, "Varsity, Queen's Western and McGill, with McGill playing each of the above mentioned universities in Montreal. Besides this it has been arranged to bring the University of Vermont team to Montreal after Christmas. This team is ranked among the best in the New England States, being exceptionally fast. This is the first time a basketball team from the United States has come to Canada for a McGill game, and it is felt that this should do much to stimulate interest in basketball, if indeed, any stimulant is necessary. It will also give the Montreal fans a chance to see the way the game is played by the best teams from the U.S.A.

HE reason some other Universities are able to serve meals more cheaply than we are doing at present is because they serve a greater number. Their patronage is greater than is ours. While the cost of provisions is essentially the same all over, the overhead expense is the varying quantity—and it varies in inverse ratio to the number served. For instance.

100 meals at 35c	\$35.00	Cost of provisions	60%.
100 meals at 45c	\$45.00	Overhead	38%.
	80.00	Margin	2%.

200 meals at 35c	\$70.00	Cost of provisions	58%.
200 meals at 45c	\$90.00	Overhead	25%.
	160.00	Margin	17%.

While the cost of provisions in each case remains practically the same, the overhead which is composed of wages to staff, electricity, steam, gas, etc, suffers a perceptible drop. It is obvious that up to a certain point so much of these must be used anyway, so the increase in service practically cuts the overhead in half. Why shouldn't you reap the benefit?

SOCCER TEAM TO PLAY THE GUARDS

McGill Finish Season
Against Montreal's
Best Team

After a week of absolute rest, the McGill Soccer team will play the Grenadier Guards this afternoon on the Shamrock Grounds at 2:30 p.m. It was announced that the Intercollegiate game against R.M.C. last Saturday would be the final appearance of the Red and White eleven for this season, and it was only at the special request of Brigadier-General Melghen, one of the most ardent supporters of Association Football in Canada, that the match was arranged. It is a tribute to the worth of the team that they should be asked to play the Guards, as the latter are finalists for Dominion honours, and are by far the best team in Montreal.

The McGill players all expressed themselves as being willing and anxious to have a try-out with their redoubtable opponents. The men are quite determined to put up a great fight against the soldiers, and as they have no illusions about an easy victory, it is certain that they are prepared to play their finest game of football this season.

The same team that won the Intercollegiate title will face the Guards this afternoon, and even though they have had no practices this week, it is hoped that they will be in as good condition as they were when R.M.C. were vanquished.

The following is the line-up:—
Davidson, Cave, Stephenson, Glavando, Archdale, Helwig, Kelland, Scott, Seaton, Moffatt and Ballenay.

M.S.P.E. MASQUERADE COLOURFUL SCENE

Juniors Entertain Seniors in R.V.C. Gym.

Last evening the R. V. C. Gymnasium was the scene of a folly masquerade in which the Physical Bds. presented themselves in a gay and varied mass of colour. The costumes were especially noteworthy for their originality. Among the most unusual were pirates, chiefs and apaches. It was very difficult to reach a decision in regard to prize for originality finally being awarded to Miss R. Copeland, an apache, the one for beauty and charm going to Miss B. Keane, a lady from the harem.

The party was given by the girls of the Junior year in honour of their sisters of the senior year, and was characterized throughout by a general feeling of good fellowship between the two years. Miss Cartwright and Miss Wain were among the guests.

After the grand march which was the first number on the programme, the evening was spent in dancing. The girls quite ably demonstrated their ability to dance to such stately measures as "Sir Roger de Coverly" as well as the more modern dances. Supper was served about ten o'clock and the "home" waltz was played shortly after.

OPENING GAMES OF R.V.C. BASKETBALL

The opening games in the R.V.C. Inter-Class Basketball series will be played this afternoon in Molson's Hall, starting at two o'clock. The Seniors will play the Juniors, and the Sophs. will play the Freshies. In addition to these two matches, the First Year's Second and Third teams will

McGill C. C. O. T. C.

ELIMINATIONS WERE MADE IN JUNIOR SQUAD

Further eliminations in the Junior and Intermediate Basketball squads were made at a practice held in Molson's Hall yesterday afternoon. Of the thirty who were practicing this week twenty were retained and these will turn out for work-outs on Monday, Wednesday, and Friday. In addition to those there will be some eight men who are being sent down from the senior squad. Coach Moore intends to make the final cut on Friday next, and the men who will represent the college will be chosen.

The work-out held yesterday did not tax the men to any great extent although there was more time devoted to scrimmage than usual. The first moments of the practice were spent in passing the ball, care being taken to adhere strictly to the rules of correct passing as pointed out by Mr. Moore. At the previous practices most of the work done was in the line of passing and the squad that threw the ball around yesterday showed that they had profited somewhat by the instructions of the coach.

Offensive and defensive formations were then attempted. Fives were chosen and these were to penetrate the defence of other fives. Each side had turns in taking the offensive and defensive. Great stress was laid on what is known as "cutting-in". The corners were well worked and the men were kept on the run all the time. It is the aim of the

coach to do away with mass playing as much as possible, and introduce a more open style. This cannot be accomplished with any great ease because most of the men have been accustomed to the mass form.

The next practice will be held on Monday at five o'clock in the Molson's Hall, and with the reduced squad it is expected to start work in earnest. The following men will turn out for the practices this week:—
E. R. Bell, J. G. Fraser, C. T. Heeneey, J. S. Goldenberg, L. Kach-gensky, H. Callaghan, S. S. Engle-berg, H. E. Ayres, S. Covsho W. Johnson, B. W. Goldberg, L. Schwartz, J. Rapp, D. Miller, S. G. Gman, M. Sorkin, L. W. Dalsey, L. Roy, C. Leach, P. Stettner, L. Freedman, H. W. Harcourt, O. Silverstone, A. Issenman.
